Education

Delhi Technological University, Delhi

2020 – 2024

Bachelor of Technology in Mathematics and Computing Engineering – 8.42 CGPA

Experience

Infosys Limited

Jul 2024 – Present

Specialist Programmer

Pune, Maharashtra

- Developed scalable Spring Boot Microservices and RESTful APIs handling 1,000+ records, integrating MySQL and MongoDB databases for hybrid data storage needs.
- Improved backend API response time by approximately 25% through database query tuning, indexing strategies, and Spring service-layer optimization.
- Deployed services on Microsoft Azure cloud, managed CI/CD pipelines using Git workflows, and validated builds with JUnit and Mockito unit tests.
- Collaborated in Agile/Scrum cross-functional teams contributing to system design discussions, code reviews, and production debugging of enterprise applications.
- **Tech Stack:** Java, Spring Boot, Microservices, REST APIs, MySQL, MongoDB, React.js, TypeScript, Git, Docker, Azure, JUnit

Projects

ComplaintIQ – AI-Powered Complaint Management System

GitHub

Java, Spring Boot, Spring AI, Gemini API, PostgreSQL, JWT, WebSocket, React.js

- Built a full-stack complaint management system integrating **Google Gemini AI** via Spring AI for automated classification of complaints across urgency, category, sentiment, and intent dimensions, eliminating manual triage overhead.
- Developed RESTful APIs covering complaint lifecycle, agent assignment, and analytics; secured with **JWT (access + refresh tokens)** and role-based access control across 5 user types using Spring Security 6.
- Engineered an SLA tracking engine using **@Scheduled** jobs with **4-tier auto-escalation hierarchy**, real-time updates via WebSocket (STOMP), and async notifications via **@Async** for non-blocking workflows.

RakhtSathi – Real-Time Blood Donor Finder Platform

GitHub | Live

Java, Spring Boot, PostgreSQL, Spring Security, Thymeleaf, Leaflet.js, JPA

- Developed a blood donor matching platform with intelligent compatibility logic across 8 blood groups and **geolocation-based donor search** using Leaflet.js and Haversine distance formula within configurable radius.
- Designed role-based access for 3 user flows (Donor, Requester, Admin) using **Spring Security with BCrypt encryption**, OTP-based email verification, and async bulk email notifications via **@Async**.
- Resolved a critical **circular dependency in Spring Security configuration** by extracting BCryptPasswordEncoder into a separate **@Configuration** class; built admin dashboard for donor verification.

Technical Skills

Languages: Java, C, C++, JavaScript, TypeScript, Python, SQL

Backend: Spring Boot, Spring Security, Spring AI, Microservices, REST APIs, JWT, JPA/Hibernate, Node.js, Express.js

Frontend & Databases: React.js, HTML5, CSS3, Tailwind CSS, Thymeleaf | MySQL, PostgreSQL, MongoDB

Cloud, DevOps & Tools: Microsoft Azure, Docker, CI/CD, Git, GitHub, JUnit, Mockito, Postman, Maven, IntelliJ IDEA

Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, System Design, Multithreading

Achievements

- **LeetCode Knight** – 1900+ rating, ranking in the top 5% of global users; solved 500+ DSA problems across platforms.
- **Codeforces Specialist** – Maintained Specialist rating of 1400+ with consistent contest performance.
- **CodeChef 3-Star Coder** – Achieved 3-star rating with Global Rank 122 in Division 3 contest.
- Secured 3rd position at Startup Weekend 2020/21 organized by E-Cell DTU among 50+ competing teams.

Leadership

E-Cell, Delhi Technological University

2022

Co-Head

- Organized large-scale entrepreneurial events with industry leaders and led the society's podcast initiative, improving student outreach and engagement.
